

New and Classic Quizzes

Common question you will receive regarding
Statistics/Moderating/Regrading

New Quizzes VS Classic Quizzes

There are many similarities between New Quizzes and Classic Quizzes, however, there are differences between them that we will cover in the upcoming slides including statistics, moderating, and regrading.

Statistics

Classic and New Quizzes both have the ability to draw statistics for the assessments students have taken. Classic Quiz has Student and Item Analysis while New Quizzes has Outcome and Item Analysis.

We will go over their FAQ and how we can help them.

1. Help! I'm not seeing any assessment information within Statistics
2. The item analysis is not showing any essay questions
3. I edited my quiz and it is now showing incorrect results on the statistics page
4. I'm not seeing a statistic option for classic quizzes

Moderating

Moderating allows for teachers and administrators to view the progress of student submissions and view the number of quiz attempts each has taken. You can also grant students extra attempts, grant extra time for timed quizzes, and manually unlock quiz attempts.

Below are some frequently asked questions regarding moderating:

1. I changed the available date for my quiz so my student can retake their quiz, however, they are still unable to attempt the quiz again.
2. Where can I add more time on an attempt in progress for New Quizzes
3. I'm trying to extend the time for a student for all classic quizzes in the course

Re-grading

Quiz regrade only works with specific quiz question types and only applies to students who have already taken the quiz. Regrading allows for teachers to update existing questions and have Canvas re-calculate the scores for students who have taken the quiz.

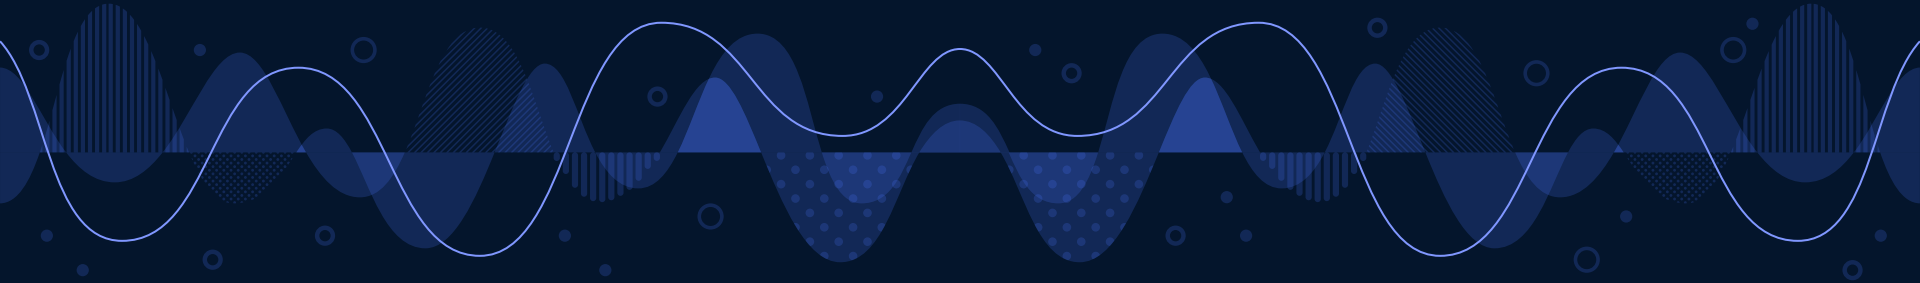

Following are some common questions we get for regrading:

1. I'm trying to regrade an essay question in a quiz but it's not giving me an option to do so.
2. I regraded a question in my New Quizzes but a student took it after I regraded and the regrade did not apply to them. WHAT DA HECK CANVAS.
3. How can I ensure my students scores are updating whenever I do a regrade on my questions?

Re-grading Continued

I updated my quiz by deleting a few questions, how come the scores are no longer showing in the gradebook

Conclusion

- ▶ Statistics will only show some questions, depending on the question type or if it has been edited
- ▶ Moderating can allow the teacher to modify quiz times, and students accessing the quiz
- ▶ Regrading allows teachers to update questions for students who have taken a quiz.
