

Notorious

so you can be victorious

What is Notorious

- Notorious is our media server where we store videos that were recorded in Canvas. We have a Notorious set up for each region.

EU - eu.nv.instructuremedia.com

US - nv.instructuremedia.com

Sydney - apse2.nv.instructuremedia.com

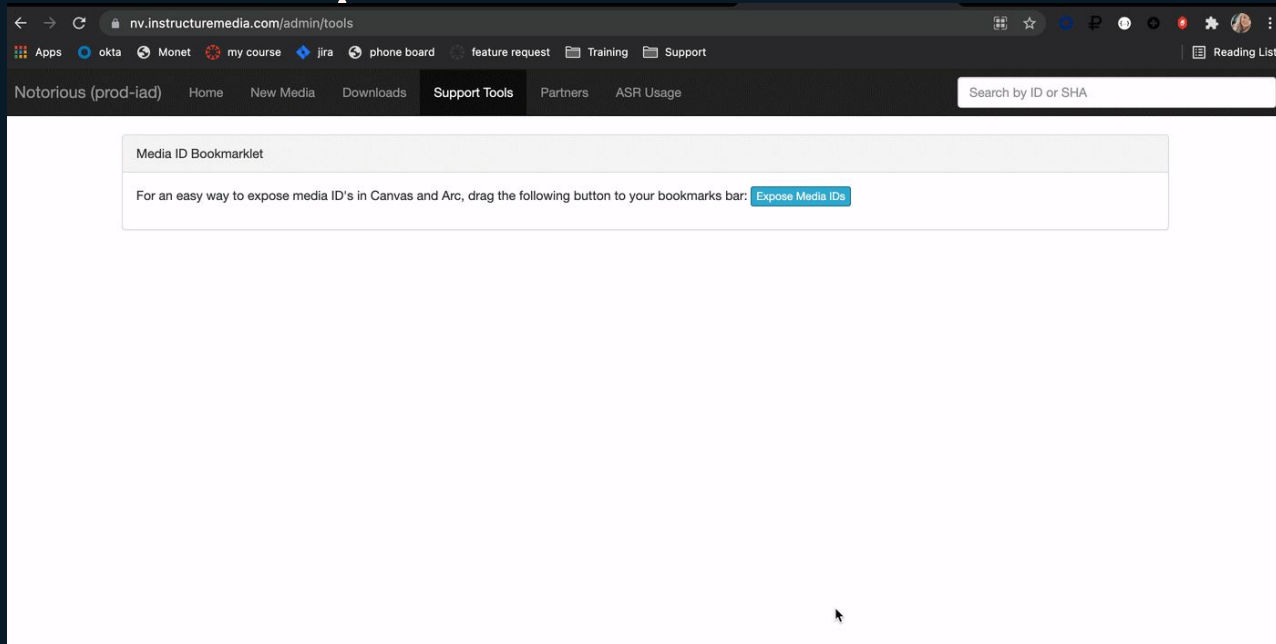

Singapore - apse1.nv.instructuremedia.com

Pdx - pdx.nv.instructuremedia.com

Notorious bookmark

If you go to this [site](#) you can drag and drop it to your bookmarks for easy access

1. This bookmark allows you to expose the media ID so you can search Notorious for the video

How to check Notorious

1. Go to where the video is stored in Canvas
2. Click the bookmark to expose the media ID
3. Go to the correct region for their instance
4. In the search bar search the media ID
5. It will pull up the video and this is where you can see if there is any recoverable media

Additional information

1. Studio does use Notorious
2. Anything outside of video searching in Notorious should be asked inside of SAAE or by asking your friendly local L2
3. Typically if a video is showing as being 0 seconds, this means it was not successful in uploading or that the upload did not contain any materials. This can happen for a number of reasons
