# Translation mistakes

qué?

# Translation mistakes?

Canvas can be used in many languages but sometimes the translation isn't perfect and we need to correct it.

We will go over how to get the correct information so it can be fixed.

# What do I do if someone reports one?

1. Identify where the user is seeing it and does it appears in multiple locations?
   a. Is this something that the user typed in or something in Canvas?
2. Verify with the user the correct translation and/or why it is better (or why the wrong one is wrong)?
3. Send it up!

# How do I send this up?

Because this would require changing the code in Canvas this will need to be send up to the L2 queue as a bug!

- ○ Remember to include the reasoning and the previous and the new translation
