Canvas Student ePortfolios (Portfolium)

Not Eportfolios

What is it?

Canvas Student ePortfolios (formerly Portfolium), are an Instructure product that allows individuals to create online portfolios where they can upload and showcase their education/work accomplishments, as well as connect with other professionals.

This allows students and recent graduates to connect with businesses and employers, as well as present their previous academic work & projects to supplement their resumes.

Don't end a chat or call by telling them to "Contact Portfolium Support." Canvas Student ePortfolios is an Instructure product, so We Are Canvas Student ePortfolios Support.
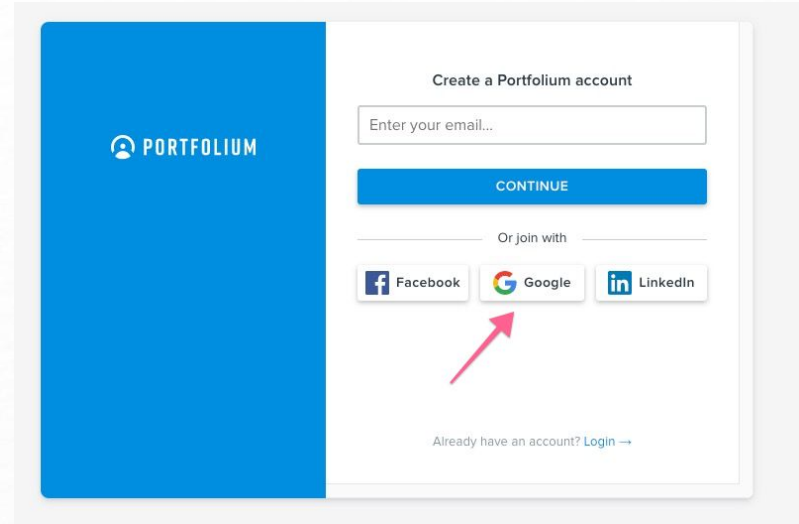

Is it free?

Canvas Student ePortfolios is free to use. The free instance of Canvas Student ePortfolios gives you the basic profile and ePortfolio features.

Canvas Student ePortfolios also has features for universities, colleges, and school districts. Universities can freely create and access their Network (think instance as a Canvas Support metaphor), which will include some basic network management functionality.

Canvas Student ePortfolios does offer additional features like Assessments, Badging, Pathways and Talent Match. However these are paid features and are implemented by the institutions.

How do I create an account?

- Navigate https://portfolium.com/join
- Join using your Instructure Google account
